More Jobs for Americans!

Because of the participation of tens-of-millions of supporters of The **Buy American Made Campaign**, we have been able to focus America's consumers on the need for more industrial and service jobs in the United States of America. Together we have become a **voice for change** as we promote the need to **restore no less than 50% of EVERY item sold in American being made in America again.**

With all of the new products being invented and those presently on the market there are endless opportunities to manufacture products made in the U.S.A. and **expand our network** of jobs and job skills. Through our efforts we see that it is really up to **America's consumers to create a demand** for items with **made in the U.S.A. label.**

The global market is here to stay, but, **by directing more of our purchasing power to items produced by American based suppliers**, we continue to work toward the **50/50 balance between domestic and imported products in America's stores.**

Since many companies stated that they moved production overseas for cheaper labor and greater profits for their investors, I think it's time for us to **shop around and support the businesses that did not abandon America so they are able to increase their product lines and get more Americans working again.**

As we continue to promote the **Buy American Made Campaign** we will once again expand our efforts during November which is now **American Made Month**. Mark your calendar and visit our internet site AmericanMadeMonth.com. There is also a link for the November event on the front page of: AmericanWorkersRadio.com.

Thanks for your participation and for spreading the word about the efforts of the Buy American Made Campaign.
