The American Made Label Represents OUR Future!

Since 1999, the Buy American Made – Support American Workers Campaign has been working to unite our fellow Americans to promote the expansion of manufacturing in America and highlight the workers proudly producing Made in America products. Why are American made labels important?

Because labels let us know the following at a glance:

1. A label lets customers know that many Americans were involved in producing, distributing, selling and servicing the items, not only selling them at stores or on the Internet.
2. A label is a symbol of pride for the company and the workers making the products.
3. A label tells us that industries in America are in competition with foreign products and we know that by supporting the American Made Label we are helping to maintain and expand jobs in the United States of America.

After years of seeing so many industries and jobs relocate outside of America, **we continue our efforts to re-establish EVERY level of America's manufacturing base in accordance with modern manufacturing standards**, and permit American industries to compete with manufacturers from around the world.

If only 50% of the products sold at stores and on the Internet right now were made in America, we would know that employment opportunities like management, manufacturing, sales, accounting, advertising, research and development, shipping, and many more jobs would be filled by American workers. As more American workers have the ability to earn a decent living, the business base in the United States of America will become much stronger.

As you go out shopping, look for, ask for and **spend as many of your dollars as possible to support the businesses making products and providing services that employ American workers in the United States of America.**
