## We Are Looking Out For American Workers!

As we look back at how America's national elected leaders agreed to several **Free Trade Agreements** that **outsourced more jobs than increased jobs in the U.S.A.**, it is another demonstration of how **America's leaders did not consider the negative effects that would occur as America's industries downsized and American workers lost jobs.**

More than 30 years have passed and because **THE AMERICAN PEOPLE** are **more united behind the Buy American Made Campaign** we see some businesses are expanding in the U.S.A. Most of the **positive efforts** taking place are a result of **Americans looking at labels and purchasing more American made products.** America's consumers are making a difference as they **speaking up where they shop** and by **shopping elsewhere if they don't find a reasonable amount of American made products available.**

As I hear from our supporters, I can definitely say it is because of the reaction of America's consumers that **investors and businesses are looking for ways to expand in the U.S.A.** and also helping local and regional businesses come to life providing the products and services needed by the American people.

The positive changes in the way Americans are thinking and shopping is a result of more **Americans united for change.** It is certainly not a result of the actions of America's national elected leaders who had more than 30 years to offer incentives for businesses to remain and grow in the U.S.A.

As we mark the celebration of Thanksgiving, **I urge you to discuss our efforts with your family and friends and invite them to visit our Internet sites: [BuyAmericanMadeCampaign.com](http://BuyAmericanMadeCampaign.com) and [AmericanWorkersRadio.com](http://AmericanWorkersRadio.com),** which promote OUR goals to expand jobs in America and support American workers.
