## Be A Patriotic American Shopper!

As we begin another holiday shopping season I urge you to **Be A Patriotic American Shopper and support 80% of the American people who are employed by small and medium-sized businesses.** The 80% includes a wide variety of manufacturers, distributors, service providers and retail stores in local neighborhoods and malls who depend on your purchases to remain in business and pay their employees.

America has always traded with the world, however **the present day imbalance between foreign made and domestic products is not in favor of American workers.** Today, **America no longer produces enough products to satisfy the day-to-day needs of the American**

**people** so foreign products not only fill the void, but in many cases dominate the American marketplace.

The imbalance has shifted so much that **Buying American Made products in American stores is often a challenge.** However, if you **shop around** you will find a growing selection of items made in the U.S.A. and your purchases will benefit local, regional and national manufacturers and more American workers.

Filling your shopping bags with mainly foreign made items without considering the plight of American workers will destroy our efforts to restore and expand America's industries. **Being a Patriotic American shopper will increase the demand for American made products,** and being more selective in what you purchase will add to the success of the **Buy American Made Campaign.** Remember, only you can decide what you are going to purchase and whether your purchasing power will benefit American workers or foreign manufacturers.

As you shop, keep in mind that **80% of the American people are employed by small and medium-sized businesses.** Therefore, moving **American made** inventory **FIRST** is an important way to **help America's businesses and workers** and keep more of our dollars circulating in the economy of the U.S.A.

During the last few months several of us have been working on the **American Workers Radio project.** As we work toward completing the project we ask that you visit: [AmericanWorkersRadio.com](http://AmericanWorkersRadio.com) and place your name on the email list.

This is Michael Blichasz. Send your comments and suggestions from the email link located on: [AmericanWorkersNeedYou.com](http://AmericanWorkersNeedYou.com).
