## **Americans Want Elected Leaders to be United!**

Now is the time for all Democratic and Republican national elected leaders, as well as business leaders across America, to **work together** to increase every level of job opportunity for our fellow-Americans with a major focus on once again manufacturing everything possible here in the United States of America.

The objective of the **Buy American Made Campaign** and **American Workers Radio** is to expand and restore jobs that were a major part of America's industrial base for over a century.

We have to acknowledge that **for over 35 years, many businesses moved out of America to escape rising operational costs, taxes and growing regulations. With Democrats and Republicans working TOGETHER we will be able to restore no less than 50% of the jobs that left the United States** and see more skilled jobs and a better economy for America and its people.

After looking at our networking abilities, **there is no reason we can't restore job stability for American workers** from the people who purchase the materials needed to manufacture products, and the jobs in packaging, delivery, sales, advertising, management, research and development of new products and additional jobs needed to get American made products to the marketplace. **In the last 35 years, many of these jobs were relocated to foreign countries,** however, there is no reason the majority of those jobs should not be based in America again.

**Working together working age and able-bodied Americans will have the job opportunities that will allow them to support themselves and their families. For more information visit the links on: [AmericanWorkersRadio.com](http://AmericanWorkersRadio.com).**
