We Can't Be Controlled By Foreign Suppliers!

Every week I hear from new people who are speaking up about **restoring jobs in the U.S.A.** The last few years of the recession have prompted a growing number of **people to speak up** because **they see the harm that outsourcing has done to American workers and America's economy.**

We continue to hear announcements that **gas prices will increase in the U.S.A.** because of unrest in other parts of the world. My first reaction was, **why does America continue to rely on foreign suppliers for such a large portion of its energy?** Our national leaders have been discussing energy independence for years but **dependency on foreign oil continues to grow instead of decline.** I'm sure you agree that **America should never be in a position where foreign powers are able to govern our fuel supply or prices.**

Through the **Buy American Made Campaign,** I have been asking you to be more sensitive to the needs of America's workers and **support the businesses manufacturing in the U.S.A.** I have been asking you to **place yourself in the position of those seeking employment and to support the Buy American Made Campaign** to ensure that employment opportunities grow, not decline.

People often tell me they now realize **too much outsourcing has hurt America's industries** and how they would like to see the hands of time turned back 20 or 30 years. This time around they would be sure to **support products made in the U.S.A. and ensure that America's towns and cities flourished with industries** where people were able to support themselves and their families.

We have many challenges ahead of us, but many possibilities if we **use our purchasing power to support products Made in the U.S.A. and speak up where we shop.**

This is Michael Blichasz. With all of us **working together we will see some positive changes in America's economy and our future.** Send me your thoughts and suggestions. My email link on the front page of AmericanWorkersNeedYou.com.
