## Promote the Made in U.S.A. Label!

It is great to see that a growing number of businesses are featuring "Made in America" or "Made in the U.S.A." on their product labels and packing.

As a result of advertisements on television, in newspapers, on the Internet and on the radio promoting Made in the U.S.A., **it is encouraging America's consumers to seek out and also speak up about the importance of the supporting the American made label** and the jobs they provide.

If you work for a company that manufactures in the United States, encourage them to **join the campaign** and promote their products as being proudly made, assembled, distributed and serviced by American workers.

Because more businesses are part of the campaign and more of our supporters are **speaking up where they shop and are spending more of their money on American made items**, we see more companies promoting their products as American made. As this continues, even more jobs have become available for American workers from the point of production to the point of sale.

For the present and future well-being of America and American workers, support everything possible that is American made so we can **restore competitive American made products** for sale in the U.S.A., in stores, on the Internet and for sale to countries around the world.

**Thanks for your participation. Kindly spread the word to others!**

This is Michael Blichasz. I appreciate hearing from you. My email address is:
