"The Blichasz Plan"

For several years I have offered **suggestions on ways to support American Workers** and the businesses that employ them. After discussions with thousands of people and hundreds of radio broadcast commentaries and newspaper articles, I am offering a brief and achievable summary. I'll call it "**The Blichasz Plan**". I feel our national elected leaders should follow these suggestions for the well-being of every American:

- 1. America's 50 governors should organize a state-wide business conference** to hear the ideas of their states' business leaders for maintaining and creating jobs. This input should be documented and followed by a national conference with governors, the president and leaders of Congress to review each state's suggestions.
- 2. America's leaders must outline long-term tax incentives** for businesses operating in the U.S.A. and those businesses that are considering bringing their operations back to America.
- 3. Americans must focus even more attention on the "Buy American Made Campaign" efforts to strengthen America's industries and create more jobs.** Buying American made **should be mandated** for all products and services purchased by the government with our tax dollars.
- 4. School authorities should mandate workforce development programs in every school so America's students know what job skills are needed by the private sector businesses of TODAY and TOMORROW.** There is no reason Americans are unable to compete in the global economy with skilled workers and profitable businesses. America's taxpayers pay for schools; we should promote the subjects that benefit America.
- 5. Eliminate all tax loopholes for corporations that manufacture overseas** and import their products for sale in America.
- 6. Businesses that produce merchandise in America should receive additional tax incentives** to help them expand the flow of American made items in our stores.
- 7. America's businesses must renew their tradition of innovation** so that more jobs can be created and we can get America's industries moving again.
- 8. Institute an America Corps program where young people across the U.S.A. can help with community services in return for college tuition credits or job training credits.**

9. America's infrastructure needs a lot of attention. **Our tax dollars must be invested to revitalize our roads, bridges and communities** and in the process create additional jobs and skilled jobs.

10. **We the American people have the power to change America's economy by supporting more American made EVERYTHING! Buying more American made** will help circulate more of our dollars in the U.S.A. and improve America's over-all economy.

These are just a few suggestions that could help America and American workers. **It would be good for national, state and local elected leaders to make them a priority.**

This is Michael Blichasz. Contact me regarding "**The Blichasz Plan**" from the Email link located on the front page of: AmericanWorkersNeedYou.com. We will be discussing more suggestions during **American Workers Radio** broadcasts on Wednesday's at 11 A.M. on 860 AM Radio. Listen live on to our rebroadcasts anytime from: AmericanWorkersRadio.com
