Rebuild America's Industries!

As **America's consumers** we have the **POWER** to turn the tide of our economy and its industries simply by **using our PURCHASING POWER WISELY**. It is important to note that as an "**American Workers' Advocate**", I am **not against imported products**. I am for a **BALANCED trade policy** that would bring about equal numbers of imported and domestic products in our stores.

Today as we go shopping, it is discouraging to see how often there are **NO American made items on the shelves or hangers**. This should never have happened with America's industries! Unfortunately it did happen, so our goal is to get through the tough times by **SUPPORTING the businesses still manufacturing in the U.S.A.** and show investors that they will be supported by the American people as they expand and **rebuild America's industries**. If we do not work toward rebuilding manufacturing in the U.S.A., there will be little growth in America's job base since **America's service-oriented economy has already reached its peak**.

As you shop, **look to see** how many brands of TV's, radios, cell phones, refrigerators, stoves, and computers are **made in the U.S.A.** Then ask yourself **why can't at least 50% of those items be made in the U.S.A again?** The restoration of just 50% of the clothing and electronics industries in America would **produce tens of millions of jobs**.

I urge you to shop around with the goal of **supporting American workers** and **buy American made FIRST**. Help us keep people now employed on the job and pave the way for new industries to invest in America. **Restoring America is up to the American people** and it will happen **if we USE OUR PURCHASING POWER WISELY**. Spread the word to your family and friends.
