Americans United For Change!

In the last few years efforts to support the **Buy American Made Campaign** have grown from whispers to a roar. At first people thought there would be limited opportunities for Americans to be united for change. **Fortunately, today we have tens-of-millions of people putting our message into action.** As people direct more of their purchasing power to American made items, business owners see the need to satisfy the growing demands of consumers. **In many cases the requests of Buy American Made Supporters were able to benefit America's manufacturers.** However, in other cases, our goals have been hard to accomplish because outsourcing has claimed so many American industries. Overall, I can say **we now have the attention of America's national leaders, business owners and investors, the news media and now its up to America's consumers to keep moving forward.**

I want to thank the radio programs rebroadcasting my commentaries, newspapers reprinting my articles and Internet sites highlighting AmericanWorkersNeedYou.com. Thanks to the television broadcasts promoting our efforts and **thanks to Diane Sawyer and David Muir of ABC World News for their well-presented Made In America series.**

Americans want to be part of the growing global economy, but **our goal is to create a 50/50 balance of American made and foreign made products in every U.S. store and also to have more American made products available to consumers around the world.**

As you can see for yourself, America is now a growing part of the new global economy and national and international investors own businesses operating in the U.S.A. I encourage you to **look for the Made in the U.S.A. label**, because then you know that many levels of American workers are being employed manufacturing, distributing and selling those products.

As we continue our efforts, I ask that you check out and forward the Internet links below:
