Stop, Look, Listen and Support American Made!

Each year there is more enthusiasm among the American people to promote **JOBS and JOB skills** in the United States of America. As Americans use more of their purchasing power to **Support items made in America**, we have more opportunities to return to being a nation of multi-skilled workers capable of producing competitive and high quality products most often purchased by the American people.

**Support American Based
Businesses that
Manufacture and Assemble
Products in the U.S.A.**

We always encourage our supporters to Stop, Look and Listen to what is happening around them while out shopping. Stop and Look at every label, and Listen closely to the responses of store personnel when you ask them if they have competitive American made items your looking to purchase.

America is a major part of the growing global economy, but we must be an equal part of that economy where American made products are readily available where we shop.

In order to create even more enthusiasm, encourage your family, friends and neighbors to **support the Buy American Made Campaign** by letting them know which American made products you purchased lately and the names and addresses of the stores that are selling American made products. **It is important for everyone to speak up where they shop** because businesses selling predominantly foreign made products need to hear that customers are asking for American made products and are shopping around for them.

Our campaign has made a major impact on the way business is being done in America. **Our campaign has the potential to get millions of additional Americans employed as more product lines are restored here in the United States.**
