Industries, Jobs and Services Equals Success!

Through the **Buy American Made Campaign** we have been able to gather the support of millions of Americans who are concerned about the **future of America**. Together we are now speaking up seriously about restoring our ailing industrial base and **producing more of the items** we use on a day-to-day basis **here in the U.S.A.**

With new technology America's businesses have more opportunities to manufacture competitively priced products so there is no excuse for businesses not to produce the items we want and need in the U.S.A. and help us expand our network of jobs. As America's businesses see that the American people are going out of their way to **purchase items with a made in the U.S.A. label**, they will feel more confident about expanding their operations to keep up with supply and demand. Greater demand and sales volume for American made products will permit businesses to produce items at competitive prices, so help our cause by **looking for items made in the U.S.A. and help us increase employment opportunities for American workers.**

The global market is here to stay, but, **by directing our purchasing power to items produced by American based suppliers**, we are helping one another and working toward the goal of a **50/50 balance between domestic and imported products in America's stores.**

Since many companies stated that they moved production overseas for cheaper labor and greater profits for their investors, I think it's time for us to **shop around and support the businesses that did not abandon America so they are able to increase their product lines and get more Americans working again.**
