Yes, America's Manufacturing Base AND Labels are Important!

When people say **American Workers Radio** supporters are working hard to promote manufacturing in **America and Made in America labels**, we thank them for noticing our efforts. Manufacturing represents the products that people want, need and desire and we feel that **no less than 50%** of the wants, needs and desires of the American people should be made in America. Labels also are an important way to bring attention to our efforts because:

- 1. A label lets the customers know that many Americans were involved in producing, distributing, selling and servicing the items.**
- 2. A label is a symbol of pride for the company and the workers who made those products.**
- 3. A label tells you that industries in America are in competition with products now for sale in America's stores.**

We all see how important it is to **re-establish EVERY level of America's manufacturing base** in accordance with modern manufacturing standards, and permit American industries to be in total competition with manufacturers from around the world. **American made labels clearly indicate that employment opportunities like management, accounting, sales, advertising, research and development, shipping and other jobs** are being utilities and adding to a strong manufacturing base in the U.S.A. Without upgrading our industrial operations, employment opportunities and America's economy will remain flat.

As you go out shopping, look for, ask for and **buy American made products**. Businesses are noticing your concerns and buying habits. Thanks for spreading the word and spending as many of your dollars as possible in support of products made in the U.S.A.

This is Michael Blichasz. Every Wednesday from 11 A.M. to 12 noon, tune in to **American Workers Radio** on 860 AM serving Philadelphia and the Tri-State area. You can also listen live or to rebroadcasts from anywhere in the world from the easy access links located on the front page of: AmericanWorkersRadio.com.
