The Supply Chain is Getting Better!

America's manufacturers and distributors of American made items certainly appreciate the customers who are purchasing their products. Operating a business of any size in the United States takes a lot of commitment so **companies and workers need faithful customers to seek out American made.**

**Support American Based
Businesses that
Manufacture and Assemble
Products in the U.S.A.**

For several years **our supporters have been urging America's businesses to expand their product lines and relocate more of their manufacturing to the United States.** We are not against imported products; we just want a better balance of items made in America so they can be available to merchandisers that supply retail stores in the United States.

For over 30 years the supply chain of American products was broken and resulted in some cases 80% to 90% of what is sold in America's stores being foreign made. Today, we have reached a new and more positive situation in the United States and as change happens **we are seeing more jobs and job skills available which is good news** for American workers and America's economy.

As businesses expand their product lines in the United States, help them by seeking out the products you need that are American made so that business owners and investors know that producing items with made in the **U.S.A. labels are being supported by the American people.**
